ChargingSpots: Ireland

Every EV charger in Ireland · Fact sheet · November 2026

ChargingSpots is an app for EV drivers in Ireland, north and south. Tell it your charging networks, your car's plugs and how you pay, and it marks every charger between you and where you're going as compatible, incompatible or not sure, and says why.

What it is	Charger finder for electric car drivers in Ireland
Platform	iPhone with iOS 17 or later; Android 8 or later. Apple CarPlay and Android Auto.
Availability	Free on the App Store, in Ireland and the UK. Google Play coming soon.

Coverage	The island of Ireland, the Republic and Northern Ireland: more than 1,300 chargers
Networks	ESB ecars, EasyGo, Tesla, Ionity, Applegreen, Circle K and others
Price	Free. No in-app purchases, no adverts.
Languages	English
Maker	Caddora, Naas, Co. Kildare, Ireland

Key features

- **Says why.** Tap a charger for how to pay, which plugs and how much power, how many cars can charge at once and what you need to start a charge.
- **A route, not a map full of pins.** Chargers are grouped near the start, on the way and near the destination, with filters for compatible only, 50 kW and up, and distance from the road.
- **Directions** in Google Maps or Waze, and Apple Maps on iPhone.
- **In the car:** on CarPlay and Android Auto, the compatible chargers on your route and your favourites, with directions.

What it can't tell you

Whether a charger is free or in use right now. Ireland's networks do not publish that openly yet, so ChargingSpots says so rather than guessing. Charger locations come from OpenStreetMap contributors.

Privacy

No account, no adverts and no tracking. Your networks, plugs and favourites stay on your phone.
